1. CORPORATE INFORMATION AND MATERIAL ACCOUNTING POLICIES

A. The Group

International Petroleum Corporation ("IPC" or the "Corporation" and, together with its subsidiaries, the "Group") is in the business of exploring for, developing and producing oil and gas. IPC holds a portfolio of oil and gas production assets and development projects in Canada, Malaysia and France with exposure to growth opportunities.

The Corporation's common shares are listed on the Toronto Stock Exchange in Canada and the Nasdaq Stockholm Exchange in Sweden. The Corporation is incorporated and domiciled in British Columbia, Canada under the Business Corporations Act. The address of its registered office is Suite 3500, 1133 Melville Street, Vancouver, BC V6E 4E5, Canada and its business address is Suite 2800, 1055 Dunsmuir Street, Vancouver, BC V7X 1L2, Canada.

B. Basis of preparation

The unaudited interim condensed consolidated financial statements have been prepared in accordance with IFRS Accounting Standards applicable to the preparation of interim financial statements, under International Accounting Standard 34, Interim Financial Reporting (together "IFRS Accounting Standards"). The unaudited interim condensed consolidated financial statements should be read in conjunction with IPC's annual audited consolidated financial statements for the year ended December 31, 2025, which have been prepared in accordance with IFRS Accounting Standards as issued by the IASB.

These unaudited interim condensed consolidated financial statements are presented in United States Dollars (USD), which is the Group's presentation and functional currency. The unaudited interim condensed consolidated financial statements have been prepared on a historical cost basis, except for items that are required to be accounted for at fair value as detailed in the Group's accounting policies. Intercompany transactions and balances have been eliminated.

The unaudited interim condensed consolidated financial statements have been approved by the Board of Directors of IPC and authorized for issuance on November 3, 2026.

The unaudited interim condensed consolidated financial statements have been prepared following the same accounting policies and methods of application as those in the Group's audited annual consolidated financial statements for the year ended December 31, 2025.

C. Change in presentation

During the current period, IPC revised the presentation on the face of the Interim Condensed Consolidated Statement of Operations by presenting finance income and finance expenses on a consolidated basis within 'Net financial items'. In addition, certain comparative figures have been reclassified to conform with the financial statements presentation in the current year.

D. Going concern

The Group's unaudited interim condensed consolidated financial statements for the three and nine months ended September 30, 2026 have been prepared on a going concern basis, which assumes that the Group will be able to realize its assets and discharge its liabilities in the normal course of business as they become due in the foreseeable future.

E. Changes in accounting policies and disclosures

Recent amendments to IFRS 9 and related IFRS 7 disclosure requirements address the settlement of financial liabilities via electronic payment systems and refine the assessment of contractual cash flow characteristics for financial assets. The amendments are effective for annual reporting periods beginning on or after January 1, 2026. These changes have not a material impact on the financial statements.

IFRS 18 replaces IAS 1 and introduces expanded requirements for how financial information is presented and disclosed. The standard adds new subtotals, categories for income and expenses, and mandates disclosure of management performance measures. It also enhances rules around aggregation and disaggregation. Adoption is retrospective, and the Corporation is currently assessing system changes, preparing draft disclosures, and planning comparative restatements ahead of the 2027 effective date.

The material accounting policies applied are consistent with those applied in the 2025 annual financial statements, except as described below.

Property, plant and equipment - Determination of availability for intended use

An asset under construction is considered available for its intended use when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. This assessment is based on the asset's technical and physical readiness and does not require the asset to have reached full production capacity or targeted profitability.

In determining when an asset is available for its intended use, the Group applies judgement and considers the relevant facts and circumstances, including completion of the construction and commissioning activities necessary for operation, satisfactory testing of the asset's technical and physical performance, availability of the infrastructure required for operation, and receipt of the approvals necessary to operate. At that date, capitalisation of costs to prepare the asset for use ceases and depreciation starts.

2. SEGMENT INFORMATION

The Group operates within several geographical areas. Operating segments are reported at a country level which is consistent with the internal reporting provided to the CEO, who is the chief operating decision maker.

The following tables present segment information regarding: revenue, production costs, other operating costs and gross profit/(loss). The Group derives its revenue from contracts with customers primarily through the transfer of oil and gas at a point in time. In addition, certain identifiable asset segment information is reported in Note 6 and 7.

[1] *The specification of deferred tax assets and tax liabilities does not agree to the face of the balance sheet due to the netting off of balances in the balance sheet when they relate to the same jurisdiction.*

The deferred tax liabilities consist of accelerated allowances, being the difference between the book and the tax value of oil and gas properties and site restoration provisions. The deferred tax liabilities will be released over the life of the oil and gas assets as the book value is depleted for accounting purposes.

Deferred tax assets in relation to tax loss carried forwards are only recognized in so far that there is a reasonable certainty as to the timing and the extent of their realization. The recognized unused tax loss carry forward mainly relates to Canada. The Group has concluded that the deferred assets will be recoverable using the estimated future taxable income based on the approved budgets and reserves reports.

[1] *The reclassification of the asset retirement obligation related to the 2025 payment to the asset retirement obligation fund in respect of the Bertam asset, Malaysia (see Note 8).*

The farm-in obligation relates to future payments for historic costs on the Bertam field in Malaysia payable for every 1 MMboe gross that the field produces above 10 MMboe gross and is capped at cumulative production of 27.5 MMboe gross.

In calculating the present value of the asset retirement obligation provision, a blended discount rate of 6% (2025: 6%) per annum was used, based on a credit risk adjusted rate. The calculation also assumes that the costs are inflated by 2% a year (2025: 2%). The payment of these obligations is spread over a period of 60 years.

The carrying amount of the Group's financial assets and liabilities approximate their fair values at the balance sheet dates.

For financial instruments measured at fair value in the balance sheet, the following fair value measurement hierarchy is used:
– Level 1: based on quoted prices in active markets;
– Level 2: based on inputs other than quoted prices as within level 1, that are either directly or indirectly observable;
– Level 3: based on inputs which are not based on observable market data.

Based on this hierarchy, financial instruments measured at fair value can be detailed as follows:
